Digital programmer software bug in descaling function

Until week 03/2009

Serial numers from P1204490001 - P1204490060 and from P1225480016 - P1225480115

Description

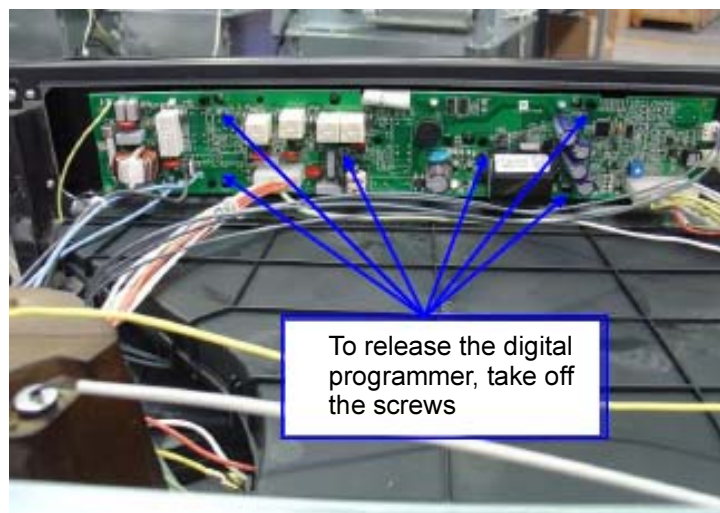

This fault only appears when there's the first need for descaling. At that time and because of this bug, the oven will be blocked (prevented from working) even if the user runs several descaling cycles.

Solution

Replace the digital programmer for a new one. The version of the software is mentioned in the characteristics label attached to the digital programmer as following:

- 1.0 – Software with bug
- 1.1 –Software with correction

Spare parts N. 534 726

Please return all defect electronics immediately to Mr Rutz.
