Enhanced sensitivity of the EMWK 1050.0 sensor keys

A new circuit board has been installed into the touch controls of the EMWK 1050.0 for the purpose of improving the sensitivity of the touch controls.

At the same time the software for the display circuit board was changed for the 528994 electronic unit. The new display circuit board can be recognised by the label with the version number U049 CGT.

Old: U1.01 CGT

New: U049 CGT

(*) Look for this number on the display circuit board

Microwave appliances with a new circuit board and improved software bear the new version number VR0.1

The following chart shows the serial numbers and versions with the corresponding electronic unit.

Serial number	Electronics system	Version
Before: O 06 06 23 0269	528994 U1.01 CGT	≤ Vr. 00
From: O 06 06 23 0269 To: O 16 11 46 046	528994 U049 CGT	≤ Vr. 00
After: O 16 11 46 0465	530795 U103 CGT	Vr. 01

Version	Electronics system	Touch Control
≤ Vr. 00	528994 Electronic unit MW 32-II MGT	528996 - Touch Control EMWK stainless steel 528997 - Touch Control EMWK aluminium
≥ Vr. 01	530795 Electronic unit TC MW 32a MGT	530796 - Touch Control II EMWK stainless steel 530797 - Touch Control II EMWK aluminium

The serial number comprises: Y Year (O = 2007); DD Day; MM Month; WW Week; NNNN serial number

Replaceability

See allocation of the display circuit boards and the microwave appliance versions.
