## Modification instructions for the new control unit, spare part no. 503187

### Models concerned

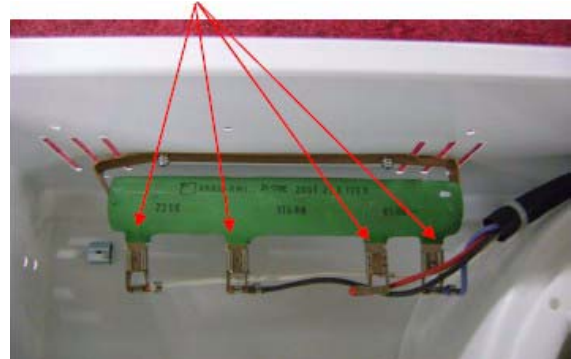

EDIP607.0E 1. Model with no circuit board  
EDIP607.0E 2. Model with a circuit board  
EDIPEM >approx. 1990 with a circuit board

 The pictures are shown as examples and may vary for the individual models.

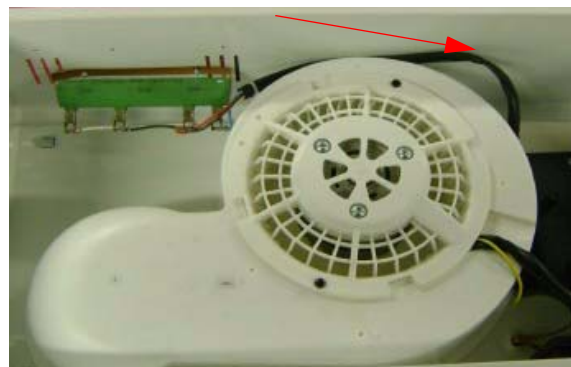

1. Remove all the plug connections from the electronic circuit board.

2. Disconnect the 4 wires from the green resistor.

3. Remove all the green resistor wiring.

### New control unit (spare-part no. 503187)

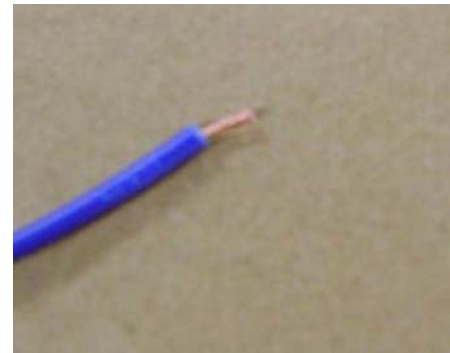

- If you have an appliance **WITHOUT** a circuit board, please carry out steps 4, 5 and 6.
- If you have an appliance **WITH** a circuit board, 4, 5 and 6 will not apply. Commence with step 7.

4. Cut the plug connection for the new control unit.

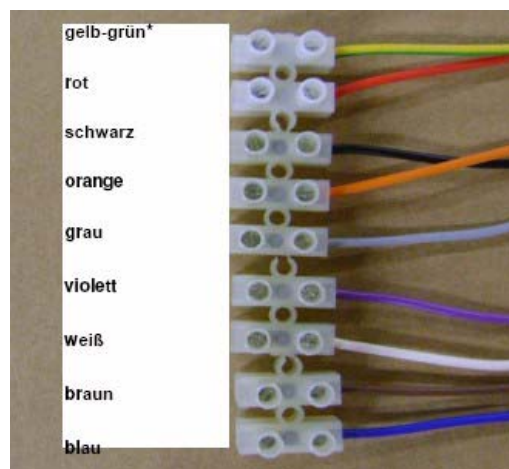

5. Cut approx. 5 mm off the sheath and expose the wires.

6. Connect all the wires to the new control unit as shown in the adjacent illustration.

the new  
control unit

from the internal  
wiring system

7. Connect the cables to the circuit board as shown on the adjacent chart.

violet		45
blue		48
brown		08
white		46
orange		0
black		26
red		42
gray		09
light blue	capacitor	44
light blue	capacitor	43
white	switch	1
white	switch	10
light blue	motor	4
red	motor	2
black	motor	3
brown	lamp	33
blue	lamp	32
brown	line	19
blue	neutral	18

### Caution!

8. Take special care not to mix up the cables for the mains connection (18/19) and the lamp cables (32/33). Check this with the numbers on the lamp cables.
