Motor for EDIP9500.0 E / EDIP6500.0E CNX6000 / CNL3000

A complete motor casing with both motors is supplied under order number 530821.

The two motors each have a 4-pole connector, which is, however, only needed for the CNL3000 cooker hood.

Cooker hoods EDIP9500.0 E / EDIP6500.0E / CNX6000 only require a 2-pole connection, so two unnecessary wires will need to be disconnected from the motor.

EDIP9500.0 E / EDIP6500.0E / CNX6000 connection

Please note: the colours of the motor connection may vary!

Make sure that lead wires of the same colour are used.
