**NEW WATER COLLECTOR SET for all of the 60cm and 45cm models**

As of serial number 424 ... (June 2004) a new water collector set with fitted coupling sleeves has been installed in all of the new models of 60cm and 45cm dishwashers.

The spare-part no. of the modified part was changed on implementation of the new part.

| Description               | 45 cm           |                 | 60 cm           |                 | Pos. |
|---------------------------|-----------------|-----------------|-----------------|-----------------|------|
|                           | Old spare-part. | New spare-part. | Old spare-part. | New spare-part. |      |
| Full water collector set  | —               | 435 489         | —               | 435504          | 155  |
| Detergent water pump hose | 434 954         | —               | 434 954         | —               | 127A |
| Discharge pump hose       | —               | —               | 434 947         | —               | 110  |

The full new sets of water collectors can replace those used in appliances produced prior to modification, provided that the old hoses are removed and the discharge pump fastening clamp is used again.
