"BEAM ON FLOOR" function

Description

Fully-integrated 45cm and 60cm dishwashers are equipped with a "beam on floor" function. This system comprises a beamer which is located between the outer door and the inner door and is attached to the right-hand hinge. At present the beamer reports when the washing cycle has been completed by means of a light signal.

As of serial number 410 ... (March 2004) this function will be modified due to an updating of the electronics software.

The beamer now remains switched on throughout the entire program cycle and only switches off when the program has been completed.

Models affected

The modification affects some of the 45cm and 60cm fully-integratable models, which are listed in the following chart:

Electronic set	Models			
	Appliance Description	Old spare-part no.	PNC	Production date
Electronic set	435 108	91193600500	20030214	IGV 657.1
Electronic set	435 108	91193600501	20030606	IGV 657.1
Electronic set	435 215	91193601100	20030926	IGV 657.1
		91193601101	20031219	IGV 657.1
		91193601102	20040227	IGV 657.1

Spare parts

Once the supply of old electronic units has been used up, the new electronic units with the modified "beam on floor" function will be supplied as a spare part.

Replaceability

The new electronic units can replace the old ones.
