

NEW CONTINUOUS-FLOW HEATER

Description

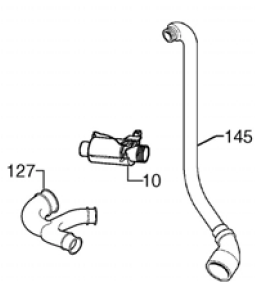

As of serial number 424 ... (June 2004), a new continuous-flow heater is to be introduced for all of the dishwashers as the old ones are phased out. The new continuous-flow heater is slimmer than the current one, thus facilitating accessibility. This does not change the output.

Models affected

The modification affects all of the 45cm and 60cm models.

A new Y-hose and an external collector are now being supplied as a spare part for all of these models.

Description	New spare-part no.	Item	
Continuous flow heater	435 472	10	
Y-shaped hose	435 482	127	
External collector	435 487	145	

Replaceability

Individual new parts cannot be replaced for parts that were used in the dishwashers prior to modification.
